**PRODUCT DESCRIPTION**

TK-FINAL SEAL is a low viscosity, breathable, deep penetrating water repellent for concrete and masonry. Due to its unique formulation, TK-FINAL SEAL may be applied as a final sealer to concrete that was previously coated with a cure and seal compound. FINAL SEAL resolvates the cure and seal resin, penetrating into the surface and sealing it off from water and harmful deicers.

**Features:**
- Forms a chemical, and permanent, bond with the substrate to provide ultimate protection against damage due to water and deicing chemical intrusion, acid rain, freeze/thaw exposure, airborne dirt, smog, industrial fumes and most other atmospheric chemicals.
- Penetrates up to 1/4” and eliminates surface moisture which can lead to spalling, freeze damage and rebar corrosion.
- Outperforms typical water repellents which can only bond physically with the surface and thus provide marginal protection.
- The coating is colorless, non-staining and non-yellowing.

**USES:**
Suitable for vertical or horizontal use on exterior above-grade concrete, burnish block, CMU, single wythe, masonry or cementitious surfaces. Applications include parking structures, concrete driveways, sidewalks, porches and patios, concrete parking lots, natural and synthetic stone, precast concrete and poured concrete walls.

**APPLICATION PROCEDURES:**

**PREPARATION:**
Before using this product, thoroughly read and understand this product’s label, technical data sheet and Safety Data Sheet (SDS).

All surfaces to be treated must be clean and structurally sound. Thoroughly clean surfaces to remove all grease, oils, form oils or other contaminants.

New Concrete Preparation: Water cure fresh concrete. As a standard procedure, allow new concrete to thoroughly cure (typically 14-28 days) before applying this product.

**MIXING:**
The material is ready for use and requires no mixing or dilution. It is unlawful to further dilute with non-exempt solvents.

**APPLICATION:**
Final Seal is supplied ready to use. To ensure substrate is frost free, it is recommended that the surface temperature be at least 40°F (4.4°C). Apply in a uniform manner in sufficient quantity to completely saturate the substrate, approximately 150 ft²/gallon. Keep application work areas small, utilize control joints and natural break points to eliminate lapping. Back roll until the concrete has changed in color to a darkened wet look. This indicates that the sealer has been re-solvated. Continue rolling until liquid stops moving or resin begins to cob-web on the roller. Keep container closed when not in use. If spilled, eliminate all sources of ignition. Contain spilled material and remove with inert absorbent using non-sparking tools. Dispose of contaminated absorbent, container, and unused contents in accordance with all applicable regulations.

**CLEAN UP:**
Clean tools, equipment and spills with TK-00 XYLENE®.

**TYPICAL PROPERTIES**

TK-FINAL SEAL is characterized by the following properties:
- Excellent penetration
- High alkali resistance and suitability for either alkaline or neutral substrates
- Low volatility
- Dries tack free
- Provides early water repellency
- Exhibits droplet effect

**Composition and Materials:**
An oligomeric, organosiloxane, aromatic solvent water repellent.

**Density:**
6.72 lbs

**Flash Point:**
76°F

**VOC Content**:
> 700 g/l

**CONDITIONS OF SALE/ LIMITED WARRANTY**

TK Products, division of the Sierra Corporation, warrants that its products conform to the label descriptions, are free from manufacturing defects, and are fit for the ordinary purposes for which such goods are used. Inasmuch as the use of TK Products' product by others and other factors affecting product performance are beyond TK Products' control, TK Products does not guarantee the results to be obtained. There are no warranties except as stated herein, either express or implied, including implied warranties of merchantability or fitness for a particular purpose. SHOULD ANY TK PRODUCTS' PRODUCT FAIL TO GIVE SATISFACTORY RESULTS, TK PRODUCTS WILL REPLACE THE PRODUCT, OR AT ITS OPTION, REFUND THE PURCHASE PRICE. THIS IS THE SOLE AND EXCLUSIVE REMEDY FOR ANY FAILURE OF TK PRODUCTS' PRODUCTS TO PERFORM AS WARRANTED AND SHALL ALSO CONSTITUTE LIQUIDATED DAMAGES IN CASE OF LOSS. UNDER NO CIRCUMSTANCES SHALL THE BUYER BE ENTITLED TO ANY OTHER REMEDY OR DAMAGES. REMEDIES FOR INCIDENTAL AND CONSEQUENTIAL DAMAGES ARE SPECIFICALLY EXCLUDED. TK Products does not authorize any person to assume for it any other liability in connection with the sale or use of its products unless specifically authorized by TK Products in writing.

**PROTECTION OF VEGETATION, GLASS AND ALUMINUM SURFACES:**

Avoid contact with live vegetation, glass and aluminum. If properly protecting these surfaces is impractical, the following steps should be performed:

1) Minimize contact of TK-FINAL SEAL with live vegetation, glass and aluminum surfaces.

2) If TK-FINAL SEAL comes into contact with glass or aluminum, thoroughly clean surfaces with Windex® or an ammonia cleaner while the material is still wet.

**FIRST AID:**

- Consult this product’s safety data sheet for additional health and safety information. Safety Data Sheets are available through TK distributors, the TK office and the TK website.

**AVAILABILITY:**

TK-FINAL SEAL is available through TK Distributors. Contact TK Products for the nearest distributor.

Packaged in 55-gallon drums, 5-gallon pails and 1-gallon cans.

**FOR PROFESSIONAL USE ONLY**

**NOTES:**

*TK-00 XYLENE must be purchased separately*
