SAFETY DATA SHEET

SECTION 1 PRODUCT AND COMPANY IDENTIFICATION

Product
Product Name: Bright Kure & Seal, Matte Finish
Product Code: TK-BR.K&S-15

Company
Manufacturer: TK Products
11400 West 47th Street
Minnetonka, MN 55343
USA
Contact: 1-952-938-7223
safety@fenixspc.com (e-mail)
1-800-424-9300 Chemtec

SECTION 2 HAZARDS IDENTIFICATION

Classification Of Substance Or Mixture:

GHS Classification In Accordance With 29 CFR 1910 (OSHA HCS)

- Flammable Liquids: Category 3
- Acute Toxicity: Category 4 Oral
- Acute Toxicity: Category 4 Dermal
- Acute Toxicity: Category 4 Inhalation
- Skin Corrosion / Irritation: Category 2
- Serious Eye Damage / Eye Irritation: Category 2 And 2A
- Germ Cell Mutagenicity: Category 1 (Both 1A And 1B)
- Carcinogenicity: Category 1 (Both 1A And 1B)
- Toxic To Specific Target Organ: Category 3
- Toxicity - Single Exposure: Category 1
- Aspiration Hazard: Category 3
- Hazardous To The Aquatic: Chronic 2
- Environment Long-Term (Chronic):

GHS Label Elements:

- Hazard Symbol:

- Signal Word: DANGER

Label Hazard Statements:

- H226: Flammable liquid and vapor
- H302+H312+H332: Harmful if swallowed, in contact with skin or if inhaled
- H304: May be fatal if swallowed or enters airways
SECTION 3 COMPOSITION / INFORMATION ON INGREDIENTS

This material is regulated as a mixture

* Chemical(s) that are chronic health hazards. Refer to section 3 for further information.
+ Toxic chemical(s) subject to the reporting requirements of section 313 of Title III and of 40 CFR 372.
++ Hazardous Air Pollutant established by the EPA as directed by the Clean Air Act of 1990.

Primary Routes Of Exposure:
Skin contact, eye contact, and inhalation.

Effects Of Acute Exposure:

**Eyes:** Contact with eyes may cause irritation including burning, watering, and redness.
**Skin:** Contact may cause mild skin irritation including redness, burning, and drying of skin. Continued exposure may develop into dermatitis. Solvents can penetrate the skin and cause systemic effects similar to those under inhalation symptoms. 2-Butoxyethanol may be absorbed through skin and produce toxic effects similar to those resulting from inhalation exposure.

**Inhalation:** High vapor concentrations are irritating to the eyes and respiratory tract, may cause headaches, dizziness, anesthesia, asthma, drowsiness, unconsciousness, and other central nervous system effects, and possibly death.

**Ingestion:** Can cause gastrointestinal irritation, nausea, vomiting and diarrhea. Small amounts aspirated into the respiratory system during ingestion or vomiting may cause mild to severe pulmonary injury.

Chronic Health Effects:
Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage (Sometimes referred to as Solvent or Painter’s Syndrome). Intentional misuse by deliberately concentrating and inhaling this material may be harmful or fatal. Chronic exposure may also cause damage to the respiratory system, lungs, eyes, skin, gastrointestinal tract, liver, spleen and kidneys. Repeated skin contact may cause persistent irritation or dermatitis.

**Medical Conditions Generally Aggravated By Exposure:**
Conditions aggravated by exposure may include skin disorders, respiratory (asthma-like) disorders, and pre-existing liver or kidney conditions.

**SECTION 4 FIRST AID MEASURES**
If On Skin: Thoroughly wash exposed area with soap and water. Remove contaminated clothing. Launder...
PRODUCT NAME: Bright Kure & Seal, Matte Finish
Revision Date: 03/25/2019

---

**Handle Information:** If In Eyes: Flush with large amounts of water for 15 minutes, lifting upper and lower lids occasionally. If symptoms persist, seek medical attention.

If Swallowed: Do not induce vomiting. Immediately administer 1-2 glasses of water and contact a physician, hospital emergency room, or poison control center for further advice. Keep person warm, quiet and seek immediate medical attention. Aspiration of material into lungs can cause severe lung damage. VOMITING CAN CAUSE CHEMICAL PNEUMONITIS WHICH CAN BE FATAL.

Inhalation: Move affected individual to fresh air. If breathing is difficult, qualified personnel should administer oxygen. If breathing has stopped give artificial respiration. If respiratory symptoms develop or persist, seek medical attention.

---

**SECTION 5 FIRE FIGHTING MEASURES**

- **Flash Point:** 110 F
- **Method Used:** TCC
- **Flammable Limits In Air By Volume—Lower:** 1
- **Upper:** 10.6

**Extinguishing Media:** Foam, CO2, or dry chemical is recommended. Water spray is recommended to cool or protect exposed materials or structures.

**Special Firefighting Procedures:** Persons exposed to products of combustion should wear self-contained breathing apparatus and full protective equipment. Isolate danger area, keep unauthorized personnel out. Water may be ineffective for extinguishing, unless used under favorable conditions by experienced fire fighters. Carbon dioxide can displace oxygen, exercise caution when using CO2 in confined areas.

---

**SECTION 6 ACCIDENTAL RELEASE MEASURES**

**Steps To Be Taken In Case Material Is Released Or Spilled:** Keep all sources of ignition and hot metal surfaces away from spill/release. Use explosion-proof non-sparking equipment. Stay upwind from area. Isolate danger and keep unauthorized personnel out. Stop source of release if possible with minimal risk. Wear appropriate protective equipment including respiratory protection. Prevent spill from entering sewers, storm drains, or any other unauthorized treatment drainage systems and natural waterways by diking ahead of the spill. Spilled material may be absorbed with an appropriate spill kit. Notify fire authorities and appropriate federal, state, and local agencies if required.

---

**SECTION 7 HANDLING AND STORAGE**

**Handling Information:** Employees who come in contact with this material must be trained in accordance to 1910.1200 of the Hazard Communication Standard.

Open container slowly to relieve any pressure. Bond and ground all equipment when transferring from one vessel to another. Static charge can accumulate by flow or agitation. Ignition can occur by static discharge. The use of explosion proof equipment is recommended and may be required. The use of respiratory protection is advised when concentrations exceed any established exposure limits and in confined spaces. Use good industrial and personal hygiene practice, wash thoroughly after handling, and do not wear contaminated clothing.

**Storage Information:** Keep containers tightly closed. Use and store material in cool, dry, well-ventilated areas away from heat, direct sunlight, hot metal surfaces, and all sources of ignition. Post “No smoking or open flame” sign. Store only in approved containers. Keep away from incompatible materials (see section 10). Protect containers against physical damage. Indoor storage should meet OSHA standards and appropriate fire codes.

---

**SECTION 8 EXPOSURE CONTROL / PERSONAL PROTECTION**

**Respiratory Protection:** Engineering or administrative controls should be implemented to reduce exposure. A NIOSH/MSHA approved respirator with an organic vapor cartridge should be used under conditions where airborne concentrations are expected to exceed exposure limits (See Section 2). Use a positive pressure air supplied respirator if there is potential for uncontrolled release, exposure levels are not known, or any other circumstances where air purifying respirators may not provide adequate protection.

**Ventilation:** If current ventilation practices are not adequate to maintain airborne concentrations below the established exposure limits, additional ventilation or exhaust systems may be required. Where explosive mixtures may be present, electrical systems safe for such locations must be used.

**Protective Gloves:** Prevent prolonged or repeated contact by wearing gloves impervious to solvents and other appropriate protective clothing. Launder contaminated clothing before reuse.

**Eye Protection:** Wear safety glasses to reduce eye contact potential. Chemical safety goggles (ANSI Z87.1 or approved equivalent) are appropriate if splashing is likely. Eye washes must be available where eye contact can occur.

**Other Protective Clothing Or Equipment:** A source of clean water should be available for flushing eyes and skin. Showers should be available if larger spills are possible.

**Work/Hygienic Practices:** Efforts should be made to minimize contact and spills. Always wash hands before eating, drinking, or smoking. Clean up spills promptly. Follow OSHA and company guidelines.

---

**SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES**

**Physical State:** Liquid

**Color:** Various colors

**Odor:** Hydrocarbon odor

**Solubility In Water:** Insoluble/Negligible

**Specific Gravity (H2O=1):** .92

**Vapor Density:** Heavier than air.

**Boiling Range:** 270 - 336 F

**Evaporation Rate:** Slower than nBuAc
Coating V.O.C.: 673 g/l (5.62 lb/gl)

SECTION 10 STABILITY AND REACTIVITY
Stability: Stable under normal conditions and handling.
Conditions To Avoid: All possible sources of ignition.
Incompatibility (Materials To Avoid): Avoid exposure to strong oxidizing agents and reducing agents.
Hazardous Decomposition Or Byproducts: Combustion may liberate toxic byproducts such as carbon dioxide, carbon monoxide, various oxides of carbon and nitrogen.
Hazardous Polymerization: Will not occur.

SECTION 11 TOXICOLOGICAL INFORMATION
Sensitization: None known.

Carcinogenicity: There is no data available to indicate any components present at greater than 0.1% may present a carcinogenic hazard.

Reproductive Toxicity: 2-Ethoxyethanol has been suggested as a cause of male and female reproductive fertility effects, and testis damage.

Teratogenicity (Birth Defects): There is no data available to indicate any components present at greater than 0.1% may cause birth defects.

Mutagenicity: 2-Butoxyethanol may cause blood disorders based on animal data.

SECTION 12 ECOLOGICAL INFORMATION
Environmental Data: Although no information is available for this specific product mixture, individual components may by themselves may have ecological affects. Trimethylbenzene is a marine pollutant under 49 CFR 172.101.

SECTION 13 DISPOSAL CONSIDERATIONS
This product is considered a RCRA hazardous waste due to the characteristic(s) of D001 (ignitability). Waste is subject to the land disposal restrictions in 40 CFR 268.40 and may require treatment standards. Consult state and local regulations to determine whether they are more stringent than the federal requirements.
Container contents should be completely used and containers empty prior to discarding. Container rinsate could be considered a RCRA hazardous waste and must be discarded in compliance with all applicable regulations. Larger empty containers, such as drums, should be returned to a professional drum reconditioner. To assure proper disposal of smaller empty containers, consult with state and local regulations and disposal authorities.

SECTION 14 TRANSPORT INFORMATION
Shipping Name: Not regulated in containers 119 gallons [450 liters] or less, Combustible Liquid in containers greater than 119 gallons

for ground travel. (For containers greater than 119 gallons, vessel, international shipments, or air: UN1263, Paint, 3, III)

SECTION 15 REGULATORY INFORMATION
All ingredients of this product are listed, or are excluded from listing, on the US Toxic Substances Control Act (TSCA) chemical substance inventory.

This product does contain a chemical(s) subject to the reporting requirements of SARA Title III, Section 313 (40CFR 372). See section 2.

State Specific Requirements:
This product contains 2-Butoxyethanol, a chemical known to the state of California to cause reproductive harm, subject to the requirements of California Proposition 65.

State Listed Components | CAS NUMBER | State Code
--- | --- | ---
2-Butoxyethanol | 111-76-2 | CA, FL, IL, MA, ME, MN, NJ, PA, RI
Trimethylbenzene | 95-63-6 | CA, MA, MN, NJ, PA
Cumene | 98-82-8 | CA, CT, FL, IL, LA, MA, ME, MN, NJ, PA, RI

SECTION 16 OTHER INFORMATION
This version replaces all previous versions. The information contained in this SDS and any recommendations, technical or otherwise, are presented in good faith and believed to be correct as of the date prepared. Although certain hazards are described herein, The Sierra Company, LLC, cannot guarantee that these are the only hazards that exist. Recipients of this information and recommendations must make their own determination as to its suitability for their purposes. In no event shall The Sierra Company, LLC, assume liability for damages or losses of any kind or nature that result from the use of or reliance upon this information and recommendations. The Sierra Company, LLC, expressly disclaims any representations and warranties of any kind, whether express or implied, as to the accuracy, completeness, noninfringement, merchantability and/or fitness for a particular purpose with respect to any information and recommendations provided. The Sierra Company, LLC, reserves the right to make any changes to the information and/or recommendations at any time, without prior subsequent notice.

Recommended Restriction: for use by trained professionals, having read the complete SDS

To the best of our knowledge the information contained here is accurate. However, neither the above named manufacturer nor any of its distributors assumes any liability whatsoever for the accuracy or the completeness of the information contained herein. Final determination of the suitability of any material is the sole responsibility of the user. All materials may present unknown hazards and should be used with caution. Although certain hazards are described herein, we cannot guarantee that these are the only hazards that exist.
